VECTOR™ AND LUXURIA™ LINEAR SERIES GAS FIREPLACES

napoleonfireplaces.com

NAPOLEON

Vector™ and Luxuria™ Linear Gas Fireplaces. Limitless Possibilities.

Napoleon introduces the most versatile series of linear gas fireplaces, the award winning Vector™ and Luxuria™ series provides you with an elegant fire element allowing the flames radiant glow to enhance every room, available as single sided or See Thru.

Napoleon's innovative Bluetooth enabled **eFIRE** app can be accessed from your mobile device and used to control everything on your fireplace (flame height, LED ember bed colors, blower and more).

Napoleon's patent pending, industry leading Dynamic Heat Control™ System and Premium Glass Guard allows for installation of combustible materials up to the fireplace opening. This heat management system eliminates the need for loud power vents, fan systems or blowers to provide better heat distribution. Take advantage of simple installation framing and easily install your televisions, sound bars or artwork above the fireplace to truly customize your home decor thanks to the drastically reduced temperatures above the fireplace.

Luxuria™ Series

Limitless Possibilities

Make a spectacular statement with Napoleon's Luxuria™ series of gas fireplaces. Thanks to our Vesta Award winning Premium Glass Guard system, there is no safety screen required, enhancing your view of the brightest flames in the series. Choose a Single Sided unit or maximize your viewing pleasure with a See Thru model. This versatile series allows for easy installation of electronics, artwork or other heat sensitive items directly above the unit, and combustible material to be installed flush to the opening. In combination with premium media options, the Luxuria™ series offers endless installation opportunities.

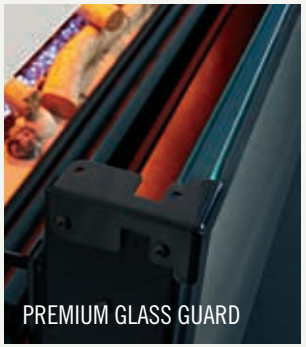
WHERE DESIGN MEETS COMFORT.

Napoleon's new patent pending heat management system, Dynamic Heat Control™ (DHC), is a system for managing the heat produced by the appliance at or around the fireplace, allowing it to circulate effectively within designated spaces. Design your living space how you imagine with versatile options that avoid complex and costly installation requirements.

Enhance life's most memorable moments.

NO COMPROMISE FUNCTIONALITY.

This heat management system eliminates the need for loud power vents, fan systems or blowers to provide better heat distribution. Easily install your televisions, sound bars or artwork above the fireplace to truly customize your home decor thanks to the drastically reduced temperatures above the fireplace. Napoleon's Luxuria™ Series fireplaces includes the Dynamic Heat Control™ System and Premium Glass Guard, providing a completely unobstructed view of the tallest flames in the Linear Series, eliminating the need for safety screens! The DHC system is optional for the Vector™ Series fireplaces.



AWARD WINNING

Dynamic HEAT CONTROL™ PATENT PENDING

On March 3rd, 2017, Napoleon's Luxuria™ series was recognized as "Best-In-Show" and was also awarded first place in the Gas Products category. Taking home two Vesta awards, the Luxuria™ line has further solidified Napoleon's stature as the leader in the hearth industry.

COMING SOON

Dynamic HEAT CONTROL™ PLUS + PATENT PENDING

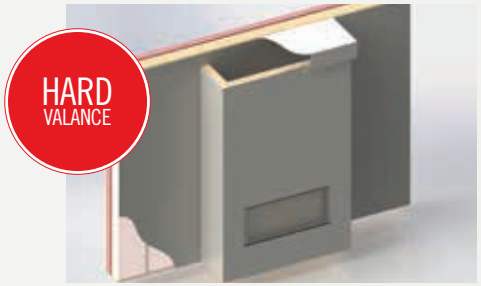
The Dynamic Heat Control™ Plus system takes heat management to the next level. The DHC Plus™ System is designed for advanced heat management even in the event of a power outage by directing warm air to any living space where heat is needed within the home, or even exhausting the heat outside if it is not required.

FOCUSED ON VERSATILITY.

Engineered to optimize air flow both through the appliance and enclosure to reduce surface temperatures, this system allows for more versatile installation opportunities allowing for increased comfort. See below for examples of the Dynamic Heat Control™ Fireplace installations options for virtually limitless possibilities.

Stopping shy of the ceiling at the top, allows rising hot air to escape freely from the top of the enclosure and into the room.

Uses an air outlet opening that will be built into the front of the constructed enclosure, at the top, centered above the appliance.



Stopping shy of the ceiling at the top, allows rising hot air to escape freely from the top of the enclosure and into the room.

This style of enclosure includes an air outlet opening that will be built into the rear of the constructed enclosure, at the top, centered above the appliance.
